### **Strengths**

- 1. Very smart player, rarely makes mistakes.**
- 2. Physical edge despite his size.**
- 3. Good offensive defenseman, very effective jumping in the rush.**

### **Area's For Improvement**

- 1. Size/strength**
- 2. Shot power and accuracy.**

### **Skill:**

Smallish defenseman who can control the play in all three ends, push the puck and create plays on his own.

### **Scouting Report:**

Kristian is one of the best defenseman in the U18 league every night he plays. His decision-making and hockey sense is incredible for his age. Even with his smallish stature, he can still win some battles and he is effective in the defensive zone by using his stick. He can really move the puck up the ice and he's dangerous when he jumps in the play. Needs to bulk up and get stronger as he can be pushed off the puck easily and will have trouble handling stronger forwards at the next level. He also needs to add a better shot element to his game so defenders don't always guess pass or deke.

### **Potential at the next level:**

Powerplay quarterback whose size may limit him from playing big defensive minutes.

**Style compares to: Brian Campbell**
