Physical Description (Injuries, Glasses, etc.) GRADUATION 2009

In 2016 he tore a ligament in his left wrist and had surgery that caused him to miss half of the season. He has long legs with a short torso. Broad shoulders with long arms.

Abilities

Has power potential for a left-fielder with a level and efficient bat speed at the plate. Tendency to hit the ball to opposite field. Quick speed and good baseball instinct makes him a threat on the bases. Speed also helps outfield range.

Weaknesses

Swing can sometimes be inconsistent with foot placement. Arm strength declines as the game progresses. At times can be streaky at times producing big hits one game with 0-4 the next two games.

With good speed and power potential, he has the ability to become a consistent major leaguer. Earlier he committed to the University of Arizona for both baseball and basketball. This all around athlete has good potential and I would like to select him in the eighth round if available.
